

U.S. Des. Pat. No. D591,579

This plane is a scaled-down version of the Veritas® Small Plow Plane. It features a $\frac{3}{32}$ " wide blade, $\frac{5}{32}$ " depth of cut and $\frac{7}{16}$ " maximum offset.

The blade is clamped in place with a small screw (using the included $\frac{5}{64}$ " hex key) and can be adjusted using the adjuster knob.

To adjust the fence, first loosen the rods by turning the two eccentric fence knobs until the lock markers point to the front of the plane.

Blade Sharpening

The A2 tool steel blade is best sharpened on a water stone. Hone the bevel and lap the bottom.

Note: A corrosion-inhibiting paperboard chip is included in the case. It will provide continuous corrosion protection for up to two years.
